

Palm Tree Beach wall decal

This special instruction sheet is a supplement to the general application instructions sheet, also included in this order. Please review this document for general application guidelines. The Surf's Up Palm Tree decal comes in pieces for easier application. Use the numbered sheet diagram below to identify decal pieces with the wall diagram/installation instructions on the back.

Step 1: Preparation

This is what you get:

Sheet:

This is what it will look like when finished

Specifications:
85" high x 60" wide

BONUS! Surfer—this decal is extra that you can add to your room to complement your new palm tree decals; or if you also bought the Surf's Up Wave, to have an extra surfer in a different color so you can play with color and shadow.

How do you want to place your Palm Trees?

Bottom Out Good choice if:

Option 1

– you want to make an entire wall scene and most of the wall is visible. This way there is no blank spot under your decal between it and the floor. To bottom out, start placing your decals at the bottom of the wall, starting with piece 1A.

Centered Vertically Good choice if:

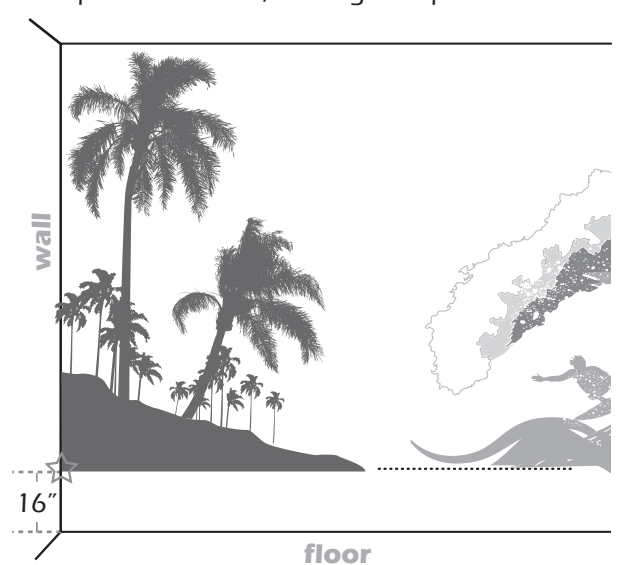

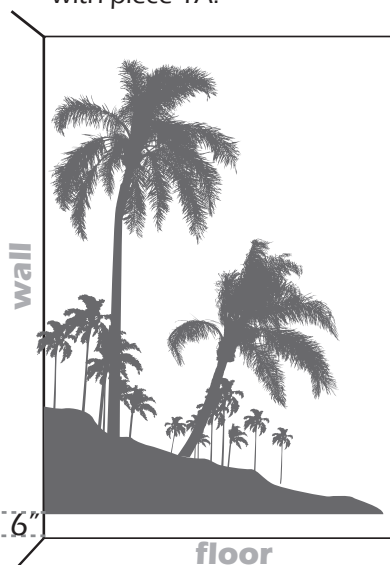

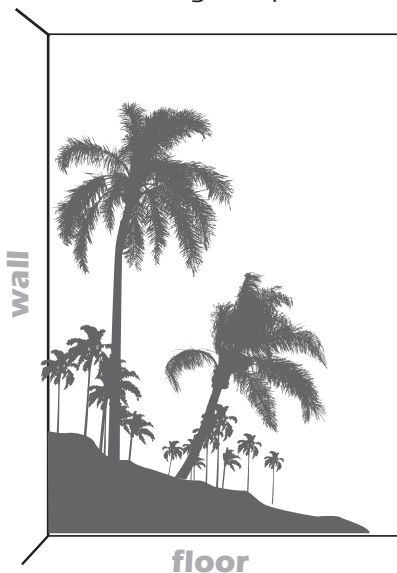

Option 2

– you have furniture that will be in front of the base of the decal. This way you can maximize your wall space and decal visibility. To do this, start placing your decals approx. 6" up from the floor, starting with piece 1A.

Option 3

Match up to Wave decal (sold separately)

–If you bought the wave and you want the bottoms of both to line up (this is how it is shown on the website) The straight part of the bottom of the two decals are lined up. To do this, start placing your decals approximately 16" up from the floor, starting with piece 1A.

Step 2: Placement

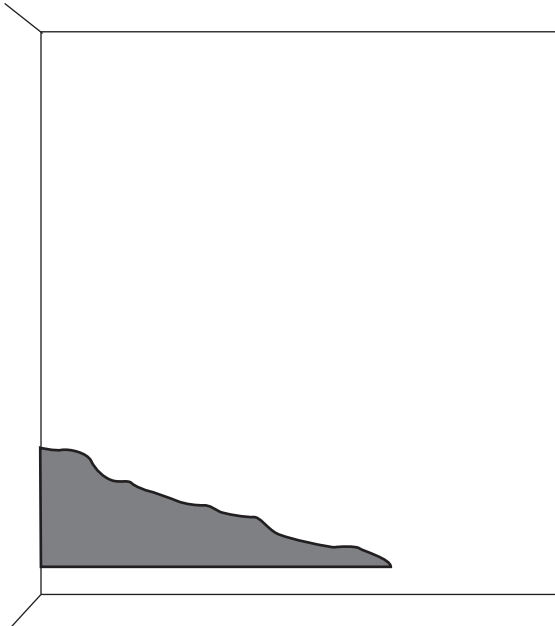

Use in conjunction with general instructions for application tips.

Remember: To place a decal, you must follow the general instruction sheet for removing the squeegeeing the decal, removing the backing and the top sheet.

1

Place Palm Tree elements according to Option 1, 2 or 3 you choose.

Use wall edge to line up with. Place piece (1a) (beach) at desired height from the floor.

2

Place tallest tree elements (2a,b).

Tip! Place tree top first (2b)! This way you can make sure you get the palm frawns where you want them visually. Then placing the trunk (2a) will be easy.

3

Place short palm tree element (3).

4

Place mini palm tree elements

randomly wherever you think they will look good. Note: Vinyl material sticks really hard to itself and other decals. so take care in placing them when they overlap each other.
